## CLIMATE EMERGENCY

# LAPFF Chair Visits Tailings Dam in Devon

**Objective:** Although LAPFF’s plans to visit Brazilian communities affected by tailings dams have been postponed due to Covid, LAPFF’s work with the communities has continued apace over the last year and a half. As part of building an understanding of how tailings dams function, LAPFF Chair, Cllr Doug McMurdo, visited a mine in Devon that has a tailings dam (pictured above and on cover).

**Achieved:** Cllr McMurdo visited the tungsten mine at the beginning of July. He was shown round the various mining functions by the mine’s CEO and other staff, and part of this tour included the tailings dam. The Devon tailings dam was of a downstream construction. When asked about the construction type, the mine staff explained that they would not use an upstream dam because this type of construction is too dangerous. One of

the big problems faced by communities affected by tailings dams globally is that they are potentially in the path of run off from upstream dams.

**In Progress:** LAPFF is continuing to engage with companies, communities, and other stakeholders, as well as undertaking research to prepare for its visit to Brazil, whenever that might be.

---

### Shell

**Objective:** LAPFF had some serious concerns about the out-going Shell Chair’s statement that oil and gas would be needed as part of the company’s portfolio for the foreseeable future. Various conversations and interactions with the CEO had also raised concerns about the company’s trajectory, both from a carbon perspective and from a business perspective.

Consequently, LAPFF was keen to meet the new Shell Chair, Andrew Mackenzie, formerly CEO of BHP and no relation to current BHP Chair, Ken MacKenzie.

**Achieved:** The meeting took place in early September, with the conversation focused primarily on Shell’s financial performance and how the company’s approach to fossil fuels would impact on that performance. LAPFF Chair, Cllr Doug McMurdo, noted that compared to BHP’s total shareholder returns over the last ten years, Shell had performed poorly and that net zero objectives would not enable the company to achieve Paris-aligned climate targets. While LAPFF was grateful to Sir Andrew for his engagement and welcomed his willingness to take suggestions, significant inconsistencies in Shell’s business strategy, business model, and climate strategy appear to persist.

# CLIMATE EMERGENCY

**In Progress:** LAPFF will continue to engage with Shell to work toward a truly Paris-aligned climate and business plan for the company.

## Rio Tinto

**Objective:** This year, LAPFF attended Rio Tinto's AGM to push the company on recognising the financial impacts of its social challenges. Therefore, Cllr McMurdo was pleased to meet Rio Tinto's Chief Financial Officer, Peter Cunningham, to discuss this issue further. Mr. Cunningham took over as interim CFO when Jakob Stausholm became CEO but has been made permanent recently.

**Achieved:** It appears that Mr Cunningham understands and agrees with the proposition that social impacts affect financial materiality at companies. However, everyone LAPFF has spoken to at Rio Tinto acknowledges that despite progress since Juukan Gorge, the company has some way to go to regain investor and affected community trust in its operations.

One area where Rio Tinto has improved substantially is in its willingness to engage with LAPFF. After the destruction of the Juukan Gorge rock shelters, LAPFF tried in vain to obtain meetings with the Chair to discuss what had happened but did not manage to do so for over six months after the shelters were destroyed. This year, LAPFF has met not only with Peter Cunningham but also with Mr. Stausholm and Chair Simon Thompson. The company continues to offer meetings with various specialist staff and affected community members with which the company engages.

LAPFF recognises that engagement is not progress. It also recognises that the staff and community members put forward by Rio Tinto probably have a particular bias or perspective on Rio Tinto's activities, especially since LAPFF continues to hear contradictory information from affected community representatives. However, engagement with all affected parties is useful for LAPFF to understand what questions to ask the various parties involved.

**In Progress:** Therefore, LAPFF is continuing to liaise with other interested investors, Rio Tinto, and affected communities and their representatives in Australia, the

US, Papua New Guinea, and elsewhere. This triangulated communication helps to paint a more complete picture for LAPFF of Rio Tinto's progress from an environmental, social, and financial perspective.

As a follow-up, the LAPFF Chair also met with Rio Tinto staff to discuss the forthcoming 'say on climate' vote at the 2022 AGM. The challenge as ever is addressing Scope 3 emissions, which comprise 95% of total emissions. In doing so, the pace of roll-out of zero-carbon technologies by the company's steel customers was noted.

## Anglo American

**Objective:** LAPFF has been concerned that Anglo American's board and management have not been sufficiently engaged with community members affected by the company's operations. However, LAPFF learned at the Anglo American AGM that the company's CEO, Mark Cutifani, had visited the company's controversial Colombian joint venture with Glencore and BHP, Cerrejon. Therefore, Cllr McMurdo met with Mr. Cutifani to hear about the CEO's experience of visiting the project.

**Achieved:** LAPFF appreciated Mr. Cutifani's openness in discussing the political, cultural, and environmental challenges surrounding Cerrejon. The project is a thermal coal mine, and just days after speaking to both Mr. Cutifani and BHP Chair, Ken MacKenzie, LAPFF received news that both Anglo American and BHP were pulling out of the joint venture to leave Glencore as the sole mining giant involved with the project. Subsequently, LAPFF representatives also met with Anglo American to discuss the company's next 'say on climate' resolution.

Anglo American has developed a detailed community engagement approach as part of its Social Way programme. However, the fact remains that all three companies have been investors in Cerrejon during a time when there have been allegations of severe human rights and environmental violations. All three companies have been named in a complaint filed with a number of OECD National Contact Points on these grounds.

**In Progress:** LAPFF will continue to engage with Anglo American on its community engagement approach and its climate approach.

## BHP Voting Alert

LAPFF issued a voting alert to oppose BHP's climate plan. While LAPFF commended BHP for putting its plan to a vote, the plan is not aligned with the goals of the Paris Agreement. BHP has undoubtedly made progress on climate, but given the pressing nature of the climate crisis, LAPFF expects all climate plans to be Paris-aligned at this stage. As the alert stated, climate change is not a negotiation.

## BHP

**Objective:** There is a debate raging in Western Australia about a proposed cultural heritage law to increase protections for Indigenous communities in the area. LAPFF had spoken to Rio Tinto about the law, and the company had not seen the final draft. However, affected communities are apparently not pleased with either the process or the content of the law. As BHP is another company affected by the law, LAPFF had a meeting with the company's Indigenous Affairs representative to find out more about the law. LAPFF is also seeking a meeting with the affected Indigenous communities.

**Achieved:** LAPFF was able to understand from the discussion with BHP that the main point of contention appears to be the level of say affected communities have over whether projects move forward, a so-called 'right of veto'. While there are apparently improvements from the last piece of legislation, the question is whether sufficient positive change will be made to the new legislation to protect affected communities from another Juukan Gorge.

**In Progress:** LAPFF will continue to engage with BHP, Rio Tinto, and affected community members to see if there is a role for LAPFF to play in promoting a positive outcome to this debate and the eventual legislation.

# COMPANY ENGAGEMENT

## ArcelorMittal

**Objective:** After the long-awaited issuing of the company's second Group Climate Action report, a meeting was held with company representatives and other CA100+ investors to discuss company progress.

**Achieved:** ArcelorMittal now has a group-wide emission intensity reduction target for 2030 of 25%, and 35% for Europe. The LAPFF Vice-Chair, Cllr Chapman commended the strengthening of targets and announcements of zero carbon steel plants in Spain and Canada. On request, the report also included a mapping of the company progress against the CA100+ benchmark. This mapping will be used by many investors to inform AGM voting. Also raised were Paris-aligned accounts, climate considerations in remuneration, consulting shareholders on a transition plan vote at the 2022 AGM and requesting that the company run the 2022 AGM as openly as it did the 2021 AGM when the meeting was run on a virtual platform.

**In Progress:** Given the strengthened decarbonization targets and 'real world' impact of the new zero carbon steel plants, this engagement was considered to have shown substantial progress.

## National Grid

**Objective:** LAPFF has had long-term ongoing engagement with National Grid, most recently as joint-lead investor in the Climate Action 100+ (CA100+) engagement. This engagement culminated in the board putting a 'say on climate' resolution to the AGM, which asked shareholders, from 2022, to approve annual reporting on the company's net zero strategy, 2030 action plan, and progress against emission reduction targets. Cllr Rob Chapman, the LAPFF Vice-Chair, met with the new chair, Paul Rasput Reynolds, and attended the AGM to encourage robust decarbonization plans.

**Achieved:** A voting alert recommended that members support the board's accountability for annual approval of a transition plan as well as article amendments supporting provisions for holding 'hybrid' annual meetings. The latter provides greater opportunities for shareowners to participate and ask

questions of board members. At the meeting with the chair, LAPFF questions focused on seeking more ambition due to the new International Energy Agency Net Zero pathway, on phasing out gas, on setting short term targets up to 2025, and on looking for changes in planned capex to allow for a larger take up of electrification for heating. At the AGM the following week, LAPFF posed questions; the questions and responses from the board can be viewed [here](#). Ms. Reynolds noted there would be a board meeting following the AGM to consider how the UK and US transition plans are implemented and remain fit for purpose.

**In Progress:** It was considered the outcome of the meeting was 'change in progress'.

## SSE

**Objective:** Cllr Rob Chapman also met with SSE to discuss the company's 'say on climate' resolution ahead of SSE's AGM in July. LAPFF and SSE have a long-standing dialogue on environmental, social, and governance issues, including a just transition. The Forum is keen to continue this dialogue as SSE has been particularly constructive in its discussions with LAPFF over the years and has undertaken some innovative work in both the social and the environmental areas, not least a just transition to a zero-carbon economy.

**Achieved:** Acknowledging that SSE is ahead of the game on much of its transition planning, LAPFF raised some concerns in particular around Scope 3 emissions measurement and targets. A number of just transition challenges for the company were also discussed, along with a further discussion on the relevance of and uses for carbon capture and storage (CCS).

After the engagement meeting, Cllr Chapman also attended SSE's AGM by virtual means to ask questions around CCS and grid structure in relation to SSE's climate goals.

**In Progress:** LAPFF and SSE have agreed to continue dialogue and speak as necessary, but in particular prior to SSE's next 'say on climate' resolution.

## HSBC

**Objectives:** The LAPFF chair met with HSBC representatives to ascertain how HSBC will be assisting its clients to set and implement coal phase-out plans in line with the bank's own commitment and timeline. Clarity was also sought on how the company is progressing on pulling out of coal-intensive industries.

**Achieved:** Representatives noted that the International Energy Agency scenario 'net zero by 2050' will be used to benchmark progress. The company has undertaken new analysis, with more data to be considered. The company joined the net zero banking alliance in April to help understand the transition journeys clients are on, and how the bank can have impact. On retreating from coal-intensive industries, it was noted that coal exposure represents 0.2% of wholesale loans and advances as measured under the Taskforce on Climate-related Financial Disclosure metrics in 2020. However, it was recognised this still represents investments of £1.2 billion, but as existing, not new, commitments.

**In Progress:** Representatives noted that they are developing the methodology for a transition risk questionnaire for clients and that commitments would be made in 2021. A further request was made to disclose fossil fuel investments in the annual report. This disclosure is done at 'top level' but would not separate out renewables investments made by such companies. At this stage, the outcome was considered 'change in progress'.

## Standard Chartered

**Objectives:** The LAPFF chair met with the Standard Chartered chair, José Viñals, to ascertain how the company is progressing working with clients on climate change to reduce emissions and align with the bank's net zero by 2050 policy.

**Achieved:** Of concern has been the bank's funding of Adaro, a major coal supplier which Standard Chartered's own analysis shows to be aligned with an increase of 5-6°C in global warming. Standard Chartered will be issuing a roadmap setting out its route to net zero in October 2021, and the board is putting a 'say on climate' resolution to the 2022 AGM.

# COMPANY ENGAGEMENT

**In Progress:** It appears that an NGO is considering filing a resolution to the Standard Chartered AGM asking for commitments not yet evident in the company's current transition plans. LAPFF met with this NGO to hear more of its concerns.

## Mitsubishi Financial

**Objective:** Cllr Glyn Caron, of the LAPFF Executive, joined a collaborative investor call organised by Asia Research and Engagement with Mitsubishi UFJ Financial (MUFG). The meeting sought to cover constituent details of a plan which would align financing to the goals of the Paris agreement and the setting of a net zero financed emissions target. This call followed LAPFF correspondence with the company on the issuing of a voting alert for the company's June AGM supporting the company issuing a plan to align financing with the Paris Agreement. The engagement was followed by media coverage on concerns over the bank's provision of finance to fossil fuel expansion and deforestation.

**Achieved:** In May, MUFG made a net zero declaration, and as part of this commitment joined the Net Zero Banking Alliance. The company is committed to developing a plan but has only just started addressing policy formulation and implementation. This initial activity has been through setting up working groups to see if improvement can be made on the current investment threshold of 50% coal, which is 50% of 'total capacity'. The company representative noted this standard would be revised and a goal set, which will be shown in due course. On physical risk, currently only flooding impact is mapped.

**In Progress:** It was agreed further correspondence would follow, including sharing examples of good practice from other financial institutions and benchmarking of these companies on coal policies. It was noted further physical risks could be considered going forward. Overall, the outcome from the meeting illustrated there was a 'change in process'.

## Sainsbury

**Objective:** LAPFF attended Sainsbury's 'Plan for Better' event and posed questions, both at this event and at the AGM, on the company's packaging practices, electric vehicles, supply chains, climate change and 'say on climate'.

**Achieved:** Sainsbury's 'Plan for Better' ESG event covered a broad range of ESG topics, noting targets and progress against them. In 2020, Sainsbury announced its climate target to be net zero by 2040 and has this year announced Scope 3 emissions target, which followed with a key theme of this year's ESG event being that the company was engraining ESG at the core of its business strategy. It is taking a number of steps in stores to tackle plastic packaging, opting for loose veg as opposed to prepacked. These steps have led Sainsbury to be recognised by Greenpeace as the retailer with the second highest proportion of loose fruit and vegetables in the market.

A large part of Sainsbury's strategy with plastic packaging is attempting to enable a circular economy, having launched an initiative in June, offering customers the opportunity to bring back any flexible plastic packaging to front of store collection points in 520 supermarkets for recycling. LAPFF has also co-led an engagement with Sainsbury in a coalition led by First Sentier Investors, pushing for suppliers and distributors of domestic and commercial washing machines to fit, as a standard procedure, filters to their products to prevent plastic microfibres entering the world's ecosystems. Sainsbury responded that they had engaged with white goods suppliers and were looking at viable options.

**In Progress:** LAPFF will be meeting with Sainsbury for a more in-depth conversation on the company's approach to a zero-carbon transition and will be querying the company further on a 'say on climate' vote.

# COMPANY ENGAGEMENT

## Persimmon

**Objective:** LAPFF has been engaging with Persimmon over a number of years following serious concerns about excessive executive pay, customer care and build quality. The Forum has also identified housebuilders as an important sector for climate change engagements, given the level of emissions from residential property. The Forum therefore sought to meet with the Chair of Persimmon, Roger Devlin, to discuss improvements in customer care and executive pay alongside how it was seeking to move to a net zero business model.

**Achieved:** It was noted how the company had made changes to its approach to

customer care following a review by Stephanie Barwise QC. The meeting covered inspections of properties following historic build quality concerns and the company’s improved customer ratings. The issue of executive pay was covered, including resolving issues that led to the high pay award of the former chief executive.

On climate change, Persimmon’s targets to reach net zero were discussed. Persimmon has made a commitment that all new homes will be net-zero by 2030 and for the company, including its operations, to be net zero by 2040. Gas boilers are being banned in new homes from 2025 and the discussion focused on how Persimmon was seeking to get ready for this change.

**In progress:** The company has made improvements to customer care but there is scope for further improvements. While emission targets have been set it will be important to monitor their progress towards net zero.

## OCCUPIED PALESTINIAN TERRITORIES (OPT) ENGAGEMENTS

**Objective:** There are short-term and long-term objectives with this engagement. The short-term objective is to have the LAPFF target companies operating in this area engage meaningfully with LAPFF on their human rights practices in the OPT. The long-term objective is to have these companies produce credible, robust, independent human rights impact assessments of their practices in the OPT so that LAPFF members can assess whether the companies’ human rights practices meet international human rights and humanitarian law standards.

**Achieved:** In line with the UN Guiding Principles on Business and Human Rights, LAPFF has been working for some months with a business and human rights expert to help with this engagement. This expert has joined LAPFF engagements with Altice and Booking Holdings this quarter, providing invaluable contributions to the engagements and ideas for how to proceed with the engagement. Both companies provided insights into their human rights due diligence processes and Booking Holdings has publicly announced that it is in the process of drafting its Human Rights Statement.

**In Progress:** LAPFF sent a follow up meeting request to the target companies and was able to schedule a few more meetings this time round. It will continue to approach companies for engagement and to request meaningful responses to information requests. Specifically, LAPFF is not content with the explanation that companies are abiding by the relevant law in the way they conduct business in the OPT. In all of LAPFF’s work globally, this response is a red flag to LAPFF that companies are treading a thin line between legality and illegality in their conduct. This margin is not acceptable to LAPFF.

# COMPANY ENGAGEMENT

## PHARMACEUTICAL COMPANY ENGAGEMENTS

**Objective:** Some of LAPFF's largest holdings are in pharmaceutical companies. Many of these companies have been contributing to the development of Covid vaccines and have faced significant challenges over the last couple of years. LAPFF is interested in finding out how the Covid pandemic has affected these companies.

**Achieved:** LAPFF has written to five of the companies in which members hold a large number of shares in aggregate to find out whether the Covid pandemic has had an impact on their business strategies or business models. The companies of interest are AstraZeneca, GlaxoSmithKline, Novartis, Roche Holding, and Sanofi.

**In Progress:** LAPFF is in the process of arranging meetings with these companies, most of whom have responded that they are willing to meet and discuss this issue.

## COLLABORATIVE ENGAGEMENTS

**Chair's Quote:** "The speed with which the 'say on climate' initiative has taken root is indicative of its importance. I am heartened to see the number of companies putting their climate plans to a vote. However, the number of plans that fail to meet the goals of the Paris Agreement is alarming. I have always shared the view that Covid is a dress rehearsal for climate change; we must learn and take meaningful action much more quickly on both fronts."

The Institutional Investor Group on Climate Change has published a guide on Investor Expectations of Companies on Physical Climate Risks and Opportunities. LAPFF has co-signed letters to 50 companies in sectors highly exposed to physical climate risk asking them to adopt the expectations set out in the guide. These expectations very broadly are to establish a climate governance framework,

to undertake physical climate risk and opportunity assessment, to develop and implement a strategy for building climate resilience, and to identify and report against metrics to demonstrate progress over time.

## COLLABORATIVE INVESTOR MEETINGS

LAPFF continued to engage with other investors in the 30% Club, the Investors for Opioid and Pharmaceutical Accountability (IOPA) and the 'Financing a Just Transition Alliance'. It is also continuing to work with CA100+ on carbon reduction at widely held companies, and with Sarasin on Paris-aligned auditing of accounts. LAPFF continues to participate in investor collaborations to combat modern slavery too and is considering how best to expand engagement on this topic.

## COLLABORATIVE COMMUNITY MEETINGS

LAPFF was pleased to learn that JGP Credito, a Brazilian investor with which LAPFF has been liaising in relation to the Samarco and Brumadinho tailings dam collapses in Brazil, visited communities affected by those disasters at the end of August. One of the main asks from the communities was that LAPFF get Brazilian investors involved to help highlight the communities' struggles in the wake of the dam collapses. JGP has been an excellent partner in this regard, but it has been a struggle for LAPFF to engage other Brazilian investors. In any case, LAPFF is planning to continue its quarterly meetings with affected community members to monitor their experiences and to see what LAPFF can do to help meet their needs.

## POLICY ENGAGEMENT

Further to the setting up of the UK Accounting Standards Endorsement Board, which has taken over from the EU Commission in endorsing international accounting standards for use in the UK, the Chair of LAPFF has written to the Chair of the Board, Pauline Wallace. The letter requests production of the guidance used by the UKEB in endorsing standards in respect of 'true and fair view'. This

request comes after the former CEO of the FRC told Parliament that government lawyers had "concluded that they agreed" with "legal advice from Martin Moore QC who [had] concluded almost exactly the opposite of what [George Bompas, QC for the Local Authorities Pension Fund Forum (LAPFF)] had concluded." However, a Freedom of Information request revealed the government position: "We have never said that the views [of the LAPFF] are incorrect and may be disregarded. ... Ultimately, whether the views of the LAPFF are incorrect would be a matter for the courts".

In September, LAPFF – as part of a 587 investors strong group representing over USD \$46 trillion in assets – participated in sending the 2021 Global Investor Statement to Governments on the Climate Crisis. Considered the 'strongest ever call by global investors for governments to raise their climate ambition and implement meaningful policies to support investment in solutions to the climate crisis' the statement calls on all governments to undertake five priority actions in 2021. For further information on this statement, please access [here](#).

## CONSULTATION RESPONSES

There has been a series of consultations by the government relating to the UK's commitments on carbon reductions, including the interim goal of reducing emissions by 78% by 2035 over 1990 levels.

Transport, is the sector with the fastest growing source of carbon emissions and LAPFF has provided three related responses to relevant government consultations. In its response to the Department of Transport's 'Jet Zero' consultation on the strategy for net zero aviation, LAPFF considers that the government should take the opportunity to support the development of UK leadership in electric flight. In the response to the DWP consultation on ending the sale of new non-zero emission heavy goods vehicles, LAPFF supports a clearly identified legislative framework for carbon reductions, so companies can make the necessary decisions and financial commitments to provide the crucial short and long-term solutions to decarbonising the economy. Responding to the Department for Transport Consultation on a new CO<sub>2</sub>

# ENGAGEMENT

emissions regulatory framework, LAPFF supports deploying the zero-emission vehicle mandate. To maximise zero emission capability, the government should ensure there is a focus on electric drive-train technology for all road vehicles. For cars or vans, the Department for Business, Energy and Industrial Strategy has already recognised that this approach is the lowest cost route to zero emissions. All responses can be viewed [here](#).
